

## **⚠️ IMPORTANT – INSTALLATION & SAFETY NOTICE**

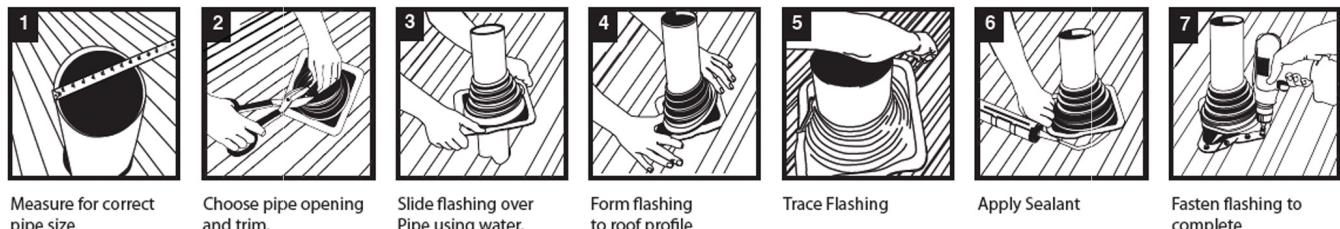

- This product includes roof flashing components and requires roof penetration and weatherproofing.
- Installation must be carried out by a suitably qualified and licensed professional in accordance with applicable building and plumbing regulations.
- Installation involves working at heights and cutting roofing materials. Appropriate safety precautions and equipment must be used at all times.
- Incorrect installation may result in water ingress, property damage, and voiding of product or roof warranties.

## **Clip-seam Pipe**

Join together as shown, the ends clip in. Best to start at one end, clip the end together and slowly work through joining the seams to the other end. Secure with brackets provided, usually to rafters or similar in the ceiling space. The tube can be cut to suit your desired length.

## **Metal Roof Dektite**

## **Mushroom Cowl**

Place cowl on top of clip-seam pipe and join together. Best to rivet it and seal it.

## **Tiled Roof Dektite**
